Software Engineer

Senior Software Engineer with **15+ years of experience** building **secure, transaction-heavy platforms** across **finance, insurance, healthcare, and SaaS** environments. Strong background in **backend-driven product development, workflow automation**, and **cloud-based systems** that handle sensitive customer and financial data.

Experienced in owning features **end-to-end** from database design and APIs to deployment and production support while working closely with founders, product, and business stakeholders in fast-moving environments.

Currently completing a **Master of Software Engineering (New Zealand)** with a focus on **software architecture, automation, cloud systems, and applied AI**.

Core Strengths

- End-to-end feature ownership (DB → API → UI → Production)
- Secure financial and payment-related systems
- Workflow automation (approvals, milestones, reporting)
- Backend-first product design
- Production system monitoring and incident resolution
- API design and system integration
- Team collaboration

Technical Skills

Backend & Full-Stack

- **Python, C#, .NET Core, VB.NET**
- FastAPI, ASP.NET MVC / Web API
- TypeScript, JavaScript
- Angular, React, Bootstrap

Architecture & Design

- Clean Architecture, OOP, SOLID principles
- DTO–Mapper–Repository pattern, UoW pattern
- Domain-Driven Design (DDD)
- Microservices & modular monoliths

Databases

- SQL Server, MySQL, Oracle, SQLite, DB2
- Stored procedures, indexing, query optimisation

Cloud & DevOps

- AWS (Lambda, API Gateway, RDS)
- Azure
- Oracle Cloud
- Docker
- CI/CD: GitHub Actions, Azure DevOps, Bamboo

Testing & Quality

- NUnit, xUnit, SpecFlow
- Selenium, Cypress
- Automated regression and CI pipelines

Tools

- Git, Jira, Confluence
- Visual Studio, VS Code

Professional Experience

Satellite Office (Smartgroup Australia)

Application Analyst / Developer

Jul 2023 – Jul 2025

Worked on enterprise financial systems supporting **salary packaging, payments, and compliance workflows** used across healthcare, government, and corporate sectors.

- Designed and delivered backend features supporting financial workflows and reporting.
- Optimised complex SQL workloads, reducing processing time from **~23 hours to 2–3 hours**.
- Built and maintained **SSRS and PDF financial reports** used by multiple business units.
- Investigated and resolved production incidents, ensuring system reliability and data accuracy.
- Collaborated with business stakeholders to translate requirements into production-ready solutions.
- Maintained automated tests and supported CI/CD-driven deployments.

Willis Towers Watson (Philippines)

Senior Software Engineer

Mar 2020 – Jul 2023

Developed and maintained **global employee benefits and financial platforms** used by enterprise clients worldwide.

- Owned end-to-end feature development using **.NET Core, Angular, and SQL Server**.
- Designed and implemented APIs and backend services for transaction-heavy systems.

- Refactored legacy monoliths into **service-based architectures**, improving scalability and deployment speed.
- Built and maintained CI/CD pipelines and automated test suites (up to **98% coverage**).
- Mentored junior developers and participated in technical hiring and code reviews.
- Worked closely with product, QA, and business teams in Agile delivery environments.

AXA Philippines

.NET Core Developer

Aug 2018 – Mar 2020

Worked on **insurance backend automation platforms** focused on operational efficiency and reporting.

- Developed backend modules automating manual financial and operational processes.
- Reduced reporting workflows from **2–3 months to 1 day** through system automation.
- Optimised SQL queries and backend services, improving performance and reliability.
- Participated in CAB meetings and production deployments.
- Maintained full unit and integration test coverage for critical systems.

L.R.B. Medical & Maternity Clinic

Full Stack Developer

Jan 2018 – Aug 2018

Built a clinic management system handling **patient records, billing, and reporting**.

- Designed and implemented a full-stack system using **.NET Core, Angular, and SQL Server**.
- Automated billing and reporting workflows, reducing manual processing time by over **50%**.
- Delivered secure data storage and access layers for sensitive patient information.
- Owned the full SDLC from requirements gathering to deployment and staff onboarding.

Eclaro International Inc. – OneBeacon Insurance Group (USA)

C#.NET Developer

May 2015 – Dec 2017

- Modernised legacy ASP.NET systems and built RESTful APIs.
- Led database migrations from Mainframe/DB2 to SQL Server.
- Implemented automated testing and CI/CD pipelines.
- Enhanced enterprise reporting systems and performance-critical modules.

Equitable Computer Services Inc.

Lead Software Analyst

Mar 2008 – May 2015

- Led development of banking and financial systems for major Philippine banks.
- Designed and built credit card management and reconciliation platforms.
- Collaborated directly with senior stakeholders on customer-facing financial systems.
- Mentored junior developers and oversaw system delivery from design to production.

Selected Projects

KaiHelper – AI-Powered Grocery Budgeting App

Master of Software Engineering – Team Project

- Backend built with **Python + FastAPI** using Clean Architecture.
- Implemented automated **receipt OCR and data extraction** workflows.
- Designed budgeting, categorisation, and insights modules.
- Planned cost-efficient deployment on **AWS Lambda + RDS**.
- Android (Kotlin) client consuming REST APIs.

RecallAI – Personal Knowledge Assistant

Independent Project

- Designed a self-hosted AI assistant using **FastAPI and FAISS**.
- Implemented document ingestion, semantic search, and chat workflows.
- Deployed on Oracle Cloud with a focus on low-cost, secure operation.
- Built modular services for future feature expansion.

Education

Master of Software Engineering (2025 – 2026)

Yoobee College of Creative Innovation – Auckland, New Zealand

Bachelor of Science in Computer Science (2003 – 2007)

Fillamer Christian University – Philippines

What I'm Looking For

A **Software Engineer Engineer** role where I can:

- Build and own **core product features**
- Work on **payments, workflows, and automation**
- Collaborate closely with founders and product teams
- Operate real systems used by real customers
- Contribute to a growing fintech or SaaS platform
