## Professional Summary

Senior Software Engineer with 16+ years of experience designing and delivering scalable enterprise and cloud-native systems across finance, insurance, healthcare, and SaaS industries. Completing a Master of Software Engineering in New Zealand, specialising in software architecture, AI-driven systems, and cloud engineering.

Proven track record of modernising legacy platforms, optimising performance (23 hours → 2 hours; 3 months → 1 day automation), and delivering secure, production-ready solutions. Strong background in .NET, Python (FastAPI), React/Angular, and AWS, with a focus on clean architecture, DevOps practices, and measurable business impact.

---

## Key Skills

### AI & Modern Engineering:

Python, FastAPI, Pandas, LLM Integration, FAISS Vector Search, OCR Pipelines, Data Analysis, Exploratory Data Analysis

### Backend & Architecture:

C#, .NET Core, ASP.NET MVC, RESTful APIs, Microservices, Clean Architecture, Domain-Driven Design (DDD), SOLID Principles, Layered Architecture, OOP, Repository & Unit of Work Patterns

### Frontend & Mobile:

React, Angular, TypeScript, JavaScript, HTML5, CSS, Bootstrap, Android (Kotlin)

### Cloud & DevOps:

AWS (Lambda, API Gateway, RDS), Microsoft Azure, Oracle Cloud, Docker, Kubernetes, CI/CD Pipelines, GitHub Actions, Azure DevOps, Bamboo

### Databases & Data Platforms:

SQL Server, MySQL, Oracle, DB2, SQLite, SSIS, SSRS, Crystal Reports

### Testing & Quality Engineering:

xUnit, NUnit, SpecFlow, Moq, Selenium, Cypress

### Legacy & Enterprise Migration Experience:

.NET Legacy Frameworks, ASP Classic, VB.Net, SOAP, WCF, MVC, MVVM, SOA, Kendo UI

### Methodologies & Tools:

Agile (Scrum), Kanban, Waterfall, Git, TFS, SVN, Jira, Confluence, Visual Studio

# Professional Experience

## Application Analyst Developer

**Satellite Office – Smartgroup Australia** | Jul 2023 – Jul 2025

- Optimised high-volume SQL workloads, reducing batch processing time from 23 hours to 2–3 hours.
- Delivered enhancements to enterprise financial platforms used across healthcare, government, and corporate sectors.
- Designed and maintained API-driven modules improving reliability and operational efficiency.
- Developed SSRS reporting solutions providing actionable insights for business units.
- Contributed to code reviews, CI/CD processes, and test automation to improve release stability.

## Senior Software Engineer

**Willis Towers Watson (Philippines)** | Mar 2020 – Jul 2023

- Led feature development for global HR and benefits platforms using .NET Core, Angular, and SQL Server.
- Contributed to monolith-to-microservices migration, improving modularity and deployment speed.
- Designed RESTful APIs and backend services supporting enterprise-scale users.
- Achieved 98% automated test coverage across backend and UI components.
- Mentored junior engineers and participated in technical hiring and architecture reviews.

## .NET Core Developer

**AXA Philippines** | Aug 2018 – Mar 2020

- Automated insurance reporting workflows, reducing manual processing from 2–3 months to 1 day.
- Refactored and optimised SQL logic, improving performance by ~45%.
- Delivered modular .NET Core components improving system maintainability.
- Participated in CAB reviews and managed on-premise production deployments.

## Full Stack Developer

**L.R.B. Medical & Maternity Clinic** | Jan 2018 – Aug 2018

- Built integrated clinic management system using .NET Core, Angular, and SQL Server.
- Reduced manual reporting by 50% through workflow automation.
- Delivered secure patient data modules supporting real-time clinical access.

## C#.NET Developer

**Eclaro International (OneBeacon Insurance Group USA)** | May 2015 – Dec 2017

- Modernised ASP.NET applications using Angular and TypeScript.
- Led DB2 to SQL Server migration improving performance and reliability.
- Implemented CI/CD pipelines using Bamboo.
- Improved system performance by up to 35% through refactoring and optimisation.

## Lead Software Analyst

## **Equitable Computer Services Inc. | Mar 2008 – May 2015**

- Led development of enterprise banking systems for major Philippine banks.
- Designed credit card management platform including database architecture and reporting modules.
- Mentored junior developers and collaborated with senior executives on system strategy.

## Education

### **Master of Software Engineering (2025–2026)**

Yoobee College of Creative Innovation – Auckland, New Zealand

### **Bachelor of Science in Computer Science (2003–2007)**

Filamer Christian University – Philippines

## Selected Projects

### KaiHelper – AI-Powered Grocery Budgeting App

- Built production-ready FastAPI backend using Clean Architecture and SOLID principles.
- Implemented OCR + GPT-based receipt parsing for automated expense tracking.
- Designed AWS deployment architecture (Lambda, API Gateway, RDS).

### RecallAI – Personal Knowledge & LLM Assistant

- Architected self-hosted AI assistant using FastAPI, local LLMs, and FAISS vector search.
- Built React-based frontend integrating semantic search and chat pipelines.
- Deployed on Oracle Cloud Free Tier with cost-optimised infrastructure.

### Salary Packaging & Financial Systems

- Built and maintained enterprise-grade financial platforms at Smartgroup (via Satellite Office), improving scalability, automation, and compliance.

### BrightChoices / Benefit Access / FSA Portal

- Delivered new features and performance improvements for employee benefits and spending platforms at Willis Towers Watson.
